

Max Bregler

Los Angeles, CA 90024 | (510)-529-9251 | maxbregler@g.ucla.edu | <https://github.com/maxwbregler>

EDUCATION

University of California, Los Angeles (UCLA)

B.S. Candidate in Mathematics of Computation

GPA: 3.83/4.0

Los Angeles, CA

June 2029

PROFESSIONAL EXPERIENCE

VisitNU

Project Lead

San Francisco, CA

January 2025 - May 2025

- Revamped high school's campus security system to allow RFID tags to check in and out of school
- Integrated RFID tags (C & Python for backend) into VisitU (Bay Area campus security company)
- Acquired 150 student signups in 2 days, garnering over 1000 uses per week of school with positive feedback

Vids2Model

Project Lead

San Francisco, CA

December 2023 - May 2024

- Developed CLI tool (TensorFlow) to create image classification models from video input without expertise
- Created website (PHP) with user queue to implement CLI tool with intuitive design

AugX Labs

Intern

New York, NY

December 2023 - January 2024

- Developed for company's flagship product (AI-powered web-based video editing software) using JS
- Developed transition system using FFMpeg (PHP backend) and Remotion (React JS frontend)
- Researched potential solution to automatically turn AirBnB listings into video advertisements

Pinscreen Inc

Research Intern

Los Angeles, CA

June 2022 - November 2022

- Developed Unity (C#) demo for company's flagship product (AI-generated 3D avatars) integrating webcam
- Researched and implemented image upscaling (GANS) for restoring materials for Balenciaga campaign

EXTRACURRICULARS

BruinML

Researcher (Emergent Intelligence)

Los Angeles, CA

January 2026 - Present

- Explored mathematical principles of Multi Arm Bandits using calculus, proving well-known RL theorems
- Discussed viability of implementing stigmergy to bandit problems to decrease environmental effects of ML

ACM Studio @ UCLA

Student Run Studios Developer (Sprite)

Los Angeles, CA

September 2025 - Present

- Developed topdown roguelike action RPG (Unity) with complex combat system with several other developers
- Implemented performance increases for game like object pooling hitboxes and hitscans
- Implemented core features in combat loop like critical hits and defense calculations

AI Safety @ UCLA

Technical Fellow (Reinforcement Learning)

Los Angeles, CA

September 2025 - December 2025

- Explored mathematical principles of MDPs using linear algebra and multivariable calculus from basics
- Developed MDP policies for many environments, including Lunar Lander and Cartpole
- Discussed academic papers from both universities and AI labs on existential risks of AI (scaling laws, etc)

SKILLS AND INTERESTS

Technical Skills: C, C++, Python (TensorFlow, PyGame), C# (Unity), PHP, JavaScript (P5.js)

Interests: Theology, Hiking, Skiing, Biking, Skateboarding, Church History, Swimming
